

Free OS (Operating System) made on Linux kernel Package management, with bundled open Source Software to produce linux *distro* that is stable, safe, flexible, simple, multi GUI versions

Ranjan xSETUP”project _ LyNx.OS.,since 2k1

A Complete distro Operating System (OS) based on UNIX like code gnu/Linux with full feature Office, media player AV encoders, editors, Graphix editor. And many more Applications including games like mahjong

UNIX being the master code on which, Apple / mac was build as independent proprietary software like DOS for Microsoft though before ms-dos

Microsoft had worked on unix variant as xenix that was abandoned for ms- windows it being runaway success of w95, w98, xp Other later versions of MS-OS of w7, w8, 8.1 & 10

MS Windows have maintained restrictions to DRM (digital rights management) Closed core/source code with No adaption No modification, No re-mastering Hence No distro' with intellectual rights No Free or Chargeable No MS like or based distro' OS Windows advantage : easy to use & user friendly

Linux : the Open Source core kernel for any one to adopt

Use, name the OS, sell distribute do what so ever

Like built on linux kernel on all, Android OS

Including Firefox OS Smart-phones with 79% + users

Android on smartphone is what MS-Windows is

to PC/Laptop OS being 79%+

Today Linux dominates Server & Big iron systems

Though Linux on PC/Laptop desktop is under 2%

**LeNx”OS : Simplifying OS from being Geeks Only
To User Friendly for all**

LN: Lakshmi Narayan temple at Barhni, Nepal

My forefathers belonged to and we are called

‘Barhaniya Misr’, meaning Misra’s of Barhni

ex : ex-Potentially ahead = **LeNx”OS..**

The xSETUP”project & LeNx”OS

1st use & inspiration in 2001, to try Linux distro’ along

with Microsoft Windows ME edition and Caldera Open Linux

Now, a continuous project to test new distro’s and consolidation

after initially in 2k1 using redHat, openSuse, mandrake, pear to

self re-master ubuntu based distro’s to develop, modify &

simplify Linux GUI for further community development

worldwide, and for self, also to help & participate to make linux

for everyone and not only for NASA (1st Linux user)

other linux users being Geeks at Universities, R & D labs,
software developers and Organisations like Google
chrome OS , Firefox OS many others
Using linux core kernel to further develop an distro'OS
Major user being Hollywood Studios 95% use after Titanic 1st film
to use linux in graphic animation AV edit etc

for me Somewhere xSETUP project that was to build
free software apps, with assured capital
mission changed to building, distro'LyNx. OS
with no capital and self funding
a free operating system (OS)

Ranjan LyNx OS, Now e2nivaran_LeNx'''OS
Build, Compiled & re-mastered on Core Linux kernel
Source Code refined by GNU/Linux
Debian, Ubuntu stable UNiX like distro'
and other derivatives to make
No DRM (digital rights management) restriction
No Piracy, No Worry, GPL compliance
near virus proof, hack proof, **free distro'OS**

1st three hardware PC/Laptop manufacturers being IBM, Dell and
HP to break, Microsoft monopoly of pre-installed OS with Linux
Later Acer developed Linpus OS, a linux distro'pre installed
List is growing with linux OS on new machines, where Linux is
supported, other markets with free Dos to further load Linux or

*Windows or Both through non-uefi, boot loader in dual, multi, OS
installation on shared HDD, RAM, CPU, GPU system
System Bios needs to be tweaked, for efi file
Stand alone UEFI Bios boot, LeNx'''OS is
lightning fast*

LeNx'''OS

*Version r27 distro'2016
Beta development & educational
testing on 7th generation cpu+gpu
x64 machine, compatible multi'boot
tried & tested up to 27 sda partitions
single HDD of 500 gb and 4 gib memory
multi'OS efi file boot loader
free dos and other Linux versions
boot delay to load sda partition vOS 27 sec ++
intel & amd desktop/laptop PC tested*

*System Font : Linux Biolinum
SanskriT & many more
Fonts & Languages
OS Requires 13 gib hdd
4 gb ram ddr3+
cpu clock 2 ghz+
Turbo for games
Quad Core x64
Machine/devise*

e2nivaran LeNx'''OS
Simplifying Linux OS to be user friendly

LyNx4u@ymail.com

No iSo download

Disclaimer : No prejudice, Bias is intended
towards any one or any
Free or Proprietary Operating System
Software application, brand name etc

e2nivaran _LeNx ””OS earlier Ranjan LyNx OS
earth elements (e2) solution (*nivaran in sanskrit*)

LyNx/LeNx (LyNx/LeNx for Linux)
is not qnx based or lynx works/technology embedded
RTOS for avionics etc or any other similar sounding soap etc
UNiX code license was available on request, a AT&T-Bell labs
Original Development, GNU/ Linux a Community project
Free without restrictions of use a continuous global development
by volunteers and funded foundation(s)
Many a donations to keep the quest for
Knowledge and further development
Of free software and UNiX like
Linux distro's being made for
Own use, in public domain for
mass use, derivative based distro'
with or without iso download
dvd, pendrive distribution
making a distro' is fun
name it, use it
offline / online

Apple / Macintosh on OEM devices as proprietary OS
MS-Windows owned by Microsoft as proprietary OS
Android Mobile OS by Google on free Linux kernel
